

Generating Revenue Through Redundancy

Increase monthly commissions by adding redundancy to your product mix.

Why Offer Network Redundancy?

ZeroOutages offers a number of unique benefits to agents:

- Easy monthly revenue, up to 30% commission (that's right 30%)
- Sell to potential customers that are already in contract
- Redundancy & load balancing are easy upgrades to a customers existing data services
- and our service is completely transparent, which means easy installations...

Our services are easy to sell, affordably priced, and take minutes to setup. The technology has been developed over a period of seven years, is proven, and is fully transparent to a customers existing infrastructure. Adding redundancy to your solutions makes your offerings more attractive as you are providing your customers with the reliability and assurance they are looking for when they consider what might happen in the event of a network outage.

Selling to Existing Customers

There are two primary reasons an existing customer would want our services:

- They wish to add a level of reliability to their Internet connectivity
- They wish to affordably increase their bandwidth using inexpensive DSL, cable, or wireless links

Simply quote out a secondary broadband circuit to your customer with our services added on.

Example: A 1.5M DSL circuit plus our service (to combine it to their existing T1) could cost \$149/mo.

Who Needs Redundancy (VoIP, SaaS, Cloud Computing)?

The simple answer is that everyone needs redundancy; the Internet has become a critical business tool. With the new web 2.0 applications coming out and the growth of VoIP and software as a service, network redundancy is fast becoming an absolute requirement.

- SaaS Applications (CRM, MS Exchange, BackOffice)
- Cloud Computing Services (centralized hosting)
- Online Data Backup Services
- and Voice Over Internet Protocol (VoIP)

How Easy Is It... Really?

ZeroOutages is the leader in managed network redundancy solutions. Since developing the technology over seven years ago to perfecting the installation and management process since then, ZeroOutages has the people and resources needed to make simple and affordable Internet redundancy generate revenue for you.
