ZeroOutages

Secure Data Center Aggregation
Improve Connectivity for Microsoft Azure

Why ZeroOutages?

Optimized Data Center Connectivity

Automated Internet and Cloud Redundancy

Prioritize Hosted Critical Applications

24/7 Network and ISP Monitoring

Patented Link Bonding Technology

KEEP YOUR HOSTED APPLICATIONS UP AND RUNNING 24/7/365
Improve Performance for Hosted Sharepoint, Exchange, SQL Server, Dynamics.
Enure reliable access to Microsoft Azure data center applications with secure back-end to all of your MS Azure servers and services. Our reliable data center services enable our customers to create a flexible and scalable Internet access system with intelligent network routing across multiple broadband links: including cable, DSL, and 3G/4G connectivity. Easily transition to hosted Microsoft Azure applications with ZeroOutages.

ZEROOUTAGES STATS

Minimum 200% Increase
  in Cloud-Service Performance

Scale Bandwidth by 600x
  via Multiple WAN Link Bonding

Network Redundancy Equal
  to 99.9999% Annual Uptime

WHAT'S INCLUDED:

- Managed OnSite Appliance
- Data Center Site2Site Bonding
- Virtual IP Data Center Failover
- Intelligent WAN Routing
- 24/7 Circuit Monitoring/Ticketing
- PCI Compliant Security
- Optional Branch SD-WAN
- Optional Managed Firewall
- Optional Content Filtering
- Optional 3G/4G Failover
- Optional Managed Wifi
