

VivoVoice Call Assurance

Ensure QoS and Redundancy for VoIP

Why VivoVoice?

VivoVoice - Prioritize VoIP Calls

VivoVoice - Automated VoIP Failover

VivoVoice - Guarantee Bandwidth for VoIP

VivoVoice - 24/7 Network Monitoring

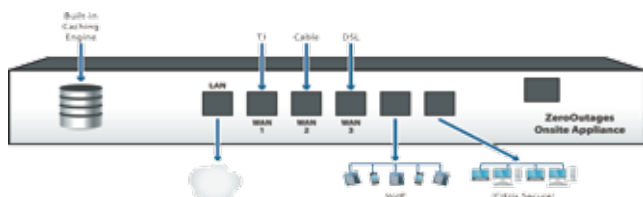

VivoVoice - Intelligent VoIP Routing

KEEP YOUR VOICE COMMUNICATIONS UP AND RUNNING 24/7/365

VivoVoice works with both hosted and SIP trunk deployments.

Deliver quality voice communications, eliminate bandwidth usage related issues, and ensure automated failover in the event of a network outage. VivoVoice provides 24/7 circuit monitoring and scoring to alert customers before significant problems occur. VivoVoice will prioritize SIP calls over other applications to provide the highest call quality possible, and in the event of an outage VivoVoice automatically re-routes calls.

EACH DEPLOYMENT HAS BUILT-IN SUPPORT FOR UP TO THREE ISP LINKS

ZEROOUTAGES STATS

Minimum 200% Increase
in Cloud-Service Performance

Scale Bandwidth by 600x
via Multiple WAN Link Bonding

Network Redundancy Equal
to 99.9999% Annual Uptime

WHAT'S INCLUDED:

- Managed MultiWAN Appliance
- 24/7 ISP Circuit Monitoring/Ticketing
- Intelligent WAN Routing
- Dynamic QoS for VoIP
- Single IP Routing Service
- Optional Managed Firewall
- Optional 3G/4G Failover
- Optional Additional Public IPs
- Optional Content Filtering
