ZeroOutages

VoIP Add-On Solution
Improve VoIP Services with ZeroOutages

WHAT IS THE ZO "PRIVATE CLOUD"?

ZeroOutages Private Cloud utilizes two or more ISP links at the customers site in order to improve the performance and reliability for cloud-based VoIP solutions and PBX applications. The VoIP traffic is forwarded through the ZeroOutages Private Cloud network in order to ensure that a single address is used for these applications.

VOIP SPECIFIC NETWORK ISSUES & THE BOTTOM LINE

Customers deploy VoIP becuase it is less expensive than traditional phone services, has more flexability, and includes a significant number of enhanced features. ZeroOutages helps VoIP customers over-come some of limitations of VoIP, like call quality and instant call failover.

HOW VOIP SALES AGENTS CAN INCREASE RELIABILITY FOR THEIR CUSTOMERS

Our VoIP partners are able to offer their customers more reliable phone service through instant and automated failover functionality along with built-in dynamic traffic shaping and QoS in order to carve out bandwidth specific for VoIP applications.

EASY INSTALLTION AND DEPLOYMENY

The ZeroOutages VoIP PC solution enables a fast, reliable and fully managed communications solution for customers that want to avoid the huge costs associated with the inability to make or receive phone calls. ZeroOutages engineering team monitors your network 24/7/365 and immeidately reacts to outages.
